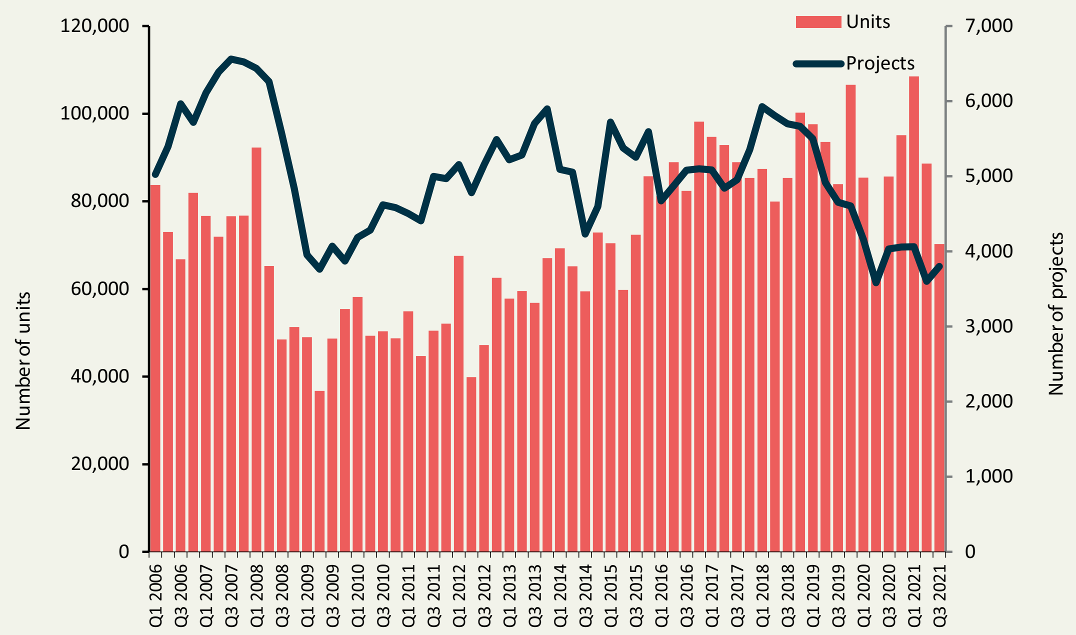
HOME BUILDERS FEDERATION

NEW HOUSING PIPELINE

After a surge in approvals at the start of the year, the number of units approved fell back during the second and third quarter. The number of units approved during the third quarter dropped by 21% against the previous three months to stand 18% down on the third quarter of 2020. The decline was due to a weakening in both private and social sector approvals.

Glenigan recorded the approval of 70,245 residential units1 during the third quarter of 2021. At 62,434 units, housing schemes of ten or more units accounted for 89% of approved units; the remainder being on smaller new build projects including self-build schemes, homes included within non-residential projects, and the conversion of non-residential properties.

Chart 1: Residential planning approvals (Great Britain)



N.B. Includes residential projects of all sizes, residential units on non-residential schemes and conversions. Source: Glenigan

At 2,308, the number of private sector housing projects (schemes of 3 or more units) securing approval during the third quarter rose by 6% against the preceding three months but was 7% lower than a year earlier. However, fewer larger schemes securing approval prompted a 19% decline in the number of units granted planning permission on private sector projects. At 73,630, the number of units approved was also 17% down on a year earlier.

At 129, the number of social housing projects (of three or more units) dropped by 20% against the second quarter and was also 29% lower than a year ago. At 6,561, the number of units was 35% down on the second quarter and 25% lower than a year earlier.

1. The range of projects covered by this report has been extended and now includes new build housing projects of all sizes, including schemes of less than 10 units, the conversion of non-residential buildings and residential units on mixed use developments.

Chart 2: Residential planning approvals by region (No. of units)

Most parts of the UK saw a softening in unit approvals during the third quarter against the preceding three months, with the East of England, Yorkshire& the Humber and Wales the only regions to see growth with increases of 25%, 14% and 19% respectively. The sharpest declines were in the North East, London and Scotland with falls of 59%, 40% and 40% against the preceding quarter. The East of England (+4%) and the South West (+12%) were the only two regions with the number of units approved up on a year ago.

Housing Pipeline report – Q3 2021 Report February 2022

IMPORTANT NOTE:

As a result of changes made by Glenigan to how they collect data on the number of permissions granted, there are some significant changes to the number of permissions reported in the Housing Pipeline reports from Q4 2020 onwards for quarters prior to that date, and to information in previous Housing Pipeline reports.

The procedural changes mean that the data collection is now more extensive and accurate than it was previously and so the numbers reported in the reports from Q4 2020, are a better reflection of the actual number of permissions being granted. The revised methodology has been agreed with the Department of Housing, Communities and Local Government, who Glenigan also provide planning permission data for and so this data set will match the official Government numbers. In its *Taking stock: The geography of housing need, permissions and completions report published in May 2021,* Lichfields considered in detail why planning permission data reported prior to Q4 2020 was not wholly accurate (and included, for example re-submitted applications) and so not a fair reflection of the number of actual plots given a permission.

HOUSING APPROVALS

The tables provide a regional breakdown of new building planning approvals since 2011

NOTES

This report is based upon an analysis of housing projects being tracked by Glenigan and held on its database of construction projects. We have now extended the range of projects covered by this report in order to provide a more complete assessment of the residential development pipeline.

The following restrictions and filters apply to the analysis:

1. New build projects of all sizes are covered by the report (Coverage was previously restricted to approvals for 10 or more units.)
2. Housing schemes are included where the development is primarily identified as being: apartments/ flats, bungalows, houses/ luxury housing or sheltered housing, key worker accommodation or sheltered housing.
3. Conversions of non-residential properties for housing are included.
4. Private and social housing data includes schemes of 3 or more units.
5. Total residential approvals include 1 & 2 unit schemes together with residential units on mixed used developments.
6. Elderly people's homes, hostels and student accommodation have been excluded from the analysis.
7. Approvals are recorded at the detailed planning stage. Where a project has secured outline planning approval and the detailed consent is being resolved through the approval of reserve matters the date of 'detailed consent' is deemed to be that of the approval of reserve matters. In the case of some projects, the reserve matters are approved piecemeal; in these circumstances the earliest approval date has been used in order to avoid double counting.
8. The late publication of planning approval decisions by local authorities may lead to the revision of planning approval data for the latest 12 months.

ABOUT HBF

The Home Builders Federation (HBF) is the representative body of the home building industry in England and Wales. HBF's members' accounts for 80% of all new homes built in England and Wales in any one year, and include companies of all sizes, ranging from multi-national, household names through regionally based businesses to small local companies.

ABOUT GLENIGAN

Glenigan is the trusted provider of project information, analysis and sales leads for the construction industry. Its comprehensive company intelligence has been helping contractors, sub-contractors and suppliers build new working relationships for more than 40 years.

With exclusive content from leading industry bodies including The Builders' Conference, Glenigan offers the widest coverage of UK tenders and construction contracts. These construction project leads are unique to Glenigan and unavailable anywhere else.

The housing approvals data analysed in this report is drawn from Glenigan's extensive database of current and planned construction projects. Glenigan's detailed coverage of planned housing projects across the UK offers valuable strategic and tactical insights into developers' active sights and pipeline, with sites tracked through to completion.
