

NEW
HOUSING PIPELINE

Q1 2022 REPORT

Published July 2022

 **Glenigan**

Analysis of market
conditions and prospects
prepared by Glenigan.

NEW HOUSING PIPELINE

The number of units approved strengthened further during the first quarter of 2022. The rise in approvals during the quarter was driven by increases in both private and social sector approvals. The number of units approved during the first quarter rose by 9% against the previous three months to total 97,207 units but was 11% down on the strong performance seen during the first quarter of last year.

At 89,252 units, housing schemes of ten or more units accounted for 92% of approved units; the remainder being on smaller new build projects including self-build schemes, homes included within non-residential projects, and the conversion of non-residential properties.

Chart 1: Residential planning approvals (Great Britain)

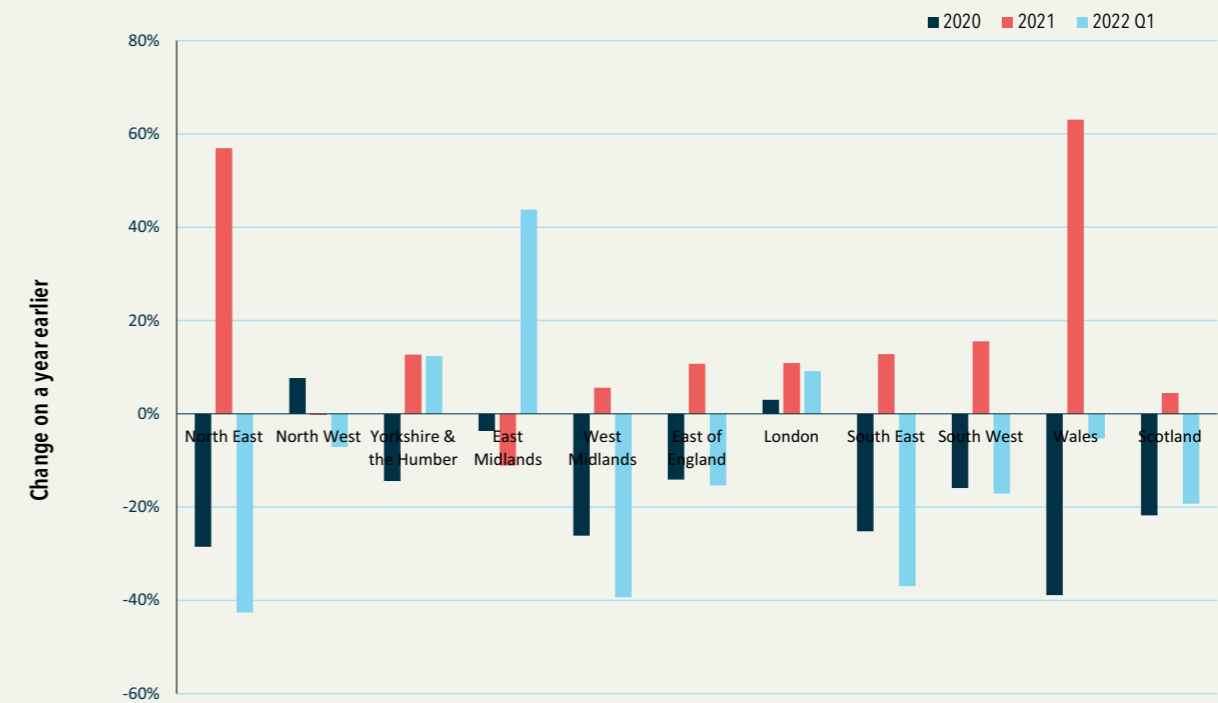

N.B. Includes residential projects of all sizes, residential units on non-residential schemes and conversions. Source: Glenigan

At 2,375, the number of private sector housing projects (schemes of 3 or more units) securing approval slipped back 1% during the first quarter against the preceding three months and was 8% lower than a year earlier. However, an increase in the average size of schemes securing approval helped lift the number of units granted planning permission on private sector projects by 16% against the fourth quarter of 2021. At 84,1003, the number of units approved was 5% down on a year earlier.

At 177, the number of social housing projects (of three or more units) rose by 11% against the fourth quarter of 2021 but was also 35% lower than a year ago. At 11,654, the number of units was 10% up on the preceding quarter but 34% lower than a year earlier.

Chart 2: Residential planning approvals by region (No. of units)

Regionally, there was a broad strengthening in approvals during the first quarter. The North West and East Midlands saw the sharp rise with increases of 66% and 120% respectively against the preceding three months. Yorkshire & the Humber, East of England and London also benefited from double digit growth of 33%, 11% and 25% respectively. In contrast the South East, West Midlands, Wales and Scotland saw a drop in approvals, with falls of 14%, 19%, 43% and 10% respectively against the preceding quarter.

Table 1: Number of residential units approved

*Moving Annual Total for England

IMPORTANT NOTE:

As a result of changes made by Glenigan to how they collect data on the number of permissions granted, there are some significant changes to the number of permissions reported in the Housing Pipeline reports from Q4 2020 onwards for quarters prior to that date, and to information in previous Housing Pipeline reports.

The procedural changes mean that the data collection is now more extensive and accurate than it was previously and so the numbers reported in the reports from Q4 2020, are a better reflection of the actual number of permissions being granted. The revised methodology has been agreed with the Department of Housing, Communities and Local Government, who Glenigan also provide planning permission data for and so this data set will match the official Government numbers. In its [Taking stock: The geography of housing need, permissions and completions report published in May 2021](#), Lichfields considered in detail why planning permission data reported prior to Q4 2020 was not wholly accurate (and included, for example re-submitted applications) and so not a fair reflection of the number of actual plots given a permission.

NOTES

This report is based upon an analysis of housing projects being tracked by Glenigan and held on its database of construction projects. We have now extended the range of projects covered by this report in order to provide a more complete assessment of the residential development pipeline.

The following restrictions and filters apply to the analysis:

1. New build projects of all sizes are covered by the report (Coverage was previously restricted to approvals for 10 or more units.)
2. Housing schemes are included where the development is primarily identified as being: apartments/flats, bungalows, houses/ luxury housing or sheltered housing, key worker accommodation or sheltered housing.
3. Conversions of non-residential properties for housing are included.
4. Private and social housing data includes schemes of 3 or more units.
5. Total residential approvals include 1 & 2 unit schemes together with residential units on mixed used developments.
6. Elderly people's homes, hostels and student accommodation have been excluded from the analysis.
7. Approvals are recorded at the detailed planning stage. Where a project has secured outline planning approval and the detailed consent is being resolved through the approval of reserve matters the date of 'detailed consent' is deemed to be that of the approval of reserve matters. In the case of some projects, the reserve matters are approved piecemeal; in these circumstances the earliest approval date has been used in order to avoid double counting.
8. The late publication of planning approval decisions by local authorities may lead to the revision of planning approval data for the latest 12 months.

ABOUT HBF

The Home Builders Federation (HBF) is the representative body of the home building industry in England and Wales. HBF's members' accounts for 80% of all new homes built in England and Wales in any one year, and include companies of all sizes, ranging from multi-national, household names through regionally based businesses to small local companies.

ABOUT GLENIGAN

Glenigan is the trusted provider of project information, analysis and sales leads for the construction industry. Its comprehensive company intelligence has been helping contractors, sub-contractors and suppliers build new working relationships for more than 40 years.

With exclusive content from leading industry bodies including The Builders' Conference, Glenigan offers the widest coverage of UK tenders and construction contracts. These construction project leads are unique to Glenigan and unavailable anywhere else.

The housing approvals data analysed in this report is drawn from Glenigan's extensive database of current and planned construction projects. Glenigan's detailed coverage of planned housing projects across the UK offers valuable strategic and tactical insights into developers' active sights and pipeline, with sites tracked through to completion.
