NEW HOUSING PIPELINE

The number of housing projects granted a planning permission during 2022 Q4 was 12% down on a year ago. The number of projects approved in England fell below 3,000 for the first time during 2022 Q4, with the number of projects in the whole of 2022 falling to under 12,500, the lowest since the data set was started in 2006.

Overall the number of units approved during 2022 totalled 323,416 units, a 12% decline on the previous year. Whilst the number of units approved increased slightly during the fourth quarter of 2022 against the preceding three months to total 83,896 units, they were still 3% down on a year ago. The rise in approvals during the fourth quarter was driven by increase in larger private and social housing projects. Smaller sized sites saw a decline in approvals.

Chart 1: Residential planning approvals (Great Britain)

At 76,859 units, housing schemes of ten or more units accounted for 92% of approved units and grew by 10% against the third quarter, but were 2% down on a year ago. The remaining 8% of units were on smaller new build projects including self-build schemes, homes included within non-residential projects, and the conversion of non-residential properties.

At 2,201 the number of private sector housing projects (schemes of 3 or more units) securing approval was unchanged on the third quarter but was 10% lower than a year earlier. An increase in the average size of schemes securing approval prompted a rise in the number of units granted planning permission on private sector projects of 6% against the third quarter. Although at 73,025, the number of units approved was 1% lower than a year earlier.

1. The range of projects covered by this report has been extended and now includes new build housing projects of all sizes, including schemes of less than 10 units, the conversion of non-residential buildings and residential units on mixed use developments.

Chart 2: Residential planning approvals by region (No. of units)

N.B. Includes residential projects of all sizes, residential units on non-residential schemes and conversions. Source: Glenigan

At 138, the number of social housing projects (of three or more units) rose by 6% against the third quarter but was 17% lower than a year ago. At 9,627, the number of units was 35% up on the preceding quarter but 15% lower than a year earlier.

N.B. Residential projects of all sizes and residential units on non-residential projects and conversions.

Regionally, the West Midlands saw the sharpest decline (45%) in the number of units approved during the fourth quarter. Unit approvals also declined in the North East (-24%), North West (-26%) and East Midlands (-2%). Approvals strengthened in all other parts of the UK, with Yorkshire & the Humber (+41%), South West (+42%) and Scotland (+51%).

Most part of the UK saw a weakening in approvals during 2022 as a whole. The North East (-46%), West Midlands (-29%), Wales (-30%) and Scotland (-25%) endured the sharpest annual fall in unit approvals. The East Midlands (+10%) and London (+2%) were the only regions to see a rise in approvals.

HOUSING APPROVALS

The tables provide a regional breakdown of new building planning approvals since 2014

*Moving Annual Total for England

IMPORTANT NOTE:

As a result of changes made by Glenigan to how they collect data on the number of permissions granted, there are some significant changes to the number of permissions reported in the Housing Pipeline reports from Q4 2020 onwards for quarters prior to that date, and to information in previous Housing Pipeline reports.

The procedural changes mean that the data collection is now more extensive and accurate than it was previously and so the numbers reported in the reports from Q4 2020, are a better reflection of the actual number of permissions being granted. The revised methodology has been agreed with the Department of Housing, Communities and Local Government, who Glenigan also provide planning permission data for and so this data set will match the official Government numbers. In its *Taking stock: The geography of housing need, permissions and completions report published in May 2021*, Lichfields considered in detail why planning permission data reported prior to Q4 2020 was not wholly accurate (and included, for example re-submitted applications) and so not a fair reflection of the number of actual plots given a permission.

NOTES

This report is based upon an analysis of housing projects being tracked by Glenigan and held on its database of construction projects. We have now extended the range of projects covered by this report in order to provide a more complete assessment of the residential development pipeline.

The following restrictions and filters apply to the analysis:

1. New build projects of all sizes are covered by the report (Coverage was previously restricted to approvals for 10 or more units.)
2. Housing schemes are included where the development is primarily identified as being: Apartments/ flats, Bungalows, Houses/ Luxury Housing or Sheltered Housing, Key Worker Accommodation or Sheltered Housing.
3. Conversions of non-residential properties for housing are included.
4. Private and social housing data includes schemes of 3 or more units.
5. Total residential approvals include 1 & 2 unit schemes together with residential units on mixed use developments.
6. Elderly people's homes, hostels and student accommodation have been excluded from the analysis.
7. Approvals are recorded at the detailed planning stage. Where a project has secured outline planning approval and the detailed consent is being resolved through the approval of reserve matters the date of 'detailed consent' is deemed to be that of the approval of reserve matters. In the case of some projects, the reserve matters are approved piecemeal; in these circumstances the earliest approval date has been used in order to avoid double counting.
8. The approvals data excludes Amendment of Planning Applications, Certificates of Lawfulness, Non-Building Applications, Removal or Variations of Conditions and responses by neighbouring planning authorities.
9. The late publication of planning approval decisions by local authorities may lead to the revision of planning approval data for the latest 12 months.

ABOUT HBF

The Home Builders Federation (HBF) is the representative body of the home building industry in England and Wales. HBF's members' accounts for 80% of all new homes built in England and Wales in any one year, and include companies of all sizes, ranging from multi-national, household names through regionally based businesses to small local companies.

ABOUT GLENIGAN

Glenigan is the trusted provider of project information, analysis and sales leads for the construction industry. Its comprehensive company intelligence has been helping contractors, sub-contractors and suppliers build new working relationships for more than 40 years.

With exclusive content from leading industry bodies including The Builders' Conference, Glenigan offers the widest coverage of UK tenders and construction contracts. These construction project leads are unique to Glenigan and unavailable anywhere else.

The housing approvals data analysed in this report is drawn from Glenigan's extensive database of current and planned construction projects. Glenigan's detailed coverage of planned housing projects across the UK offers valuable strategic and tactical insights into developers' active sights and pipeline, with sites tracked through to completion.
