

# Skills Framework- Dryliner & Plasterer

## **Overview**

A dryliner creates the walls and rooms in a building using stud partitioning and plasterboard sheets. They also hide pipes and wires, create space for insulation and install partitions, suspended ceilings and raised flooring. A plasterer makes walls and ceilings smooth and ready for decorating. They are skilled in applying different kinds of plaster to inside walls and ceilings to create outstanding finishes.

These roles consist of lifting and moving panels into place and sometimes working on platforms to fit a ceiling.

To use the Skills Framework, follow the table below to see what training standards are necessary for site managers and assistant site managers. If there are any gaps in your training, you can find the right training course and provider along with average costs below.

#### Health, Safety and Environment

Mandatory for a dryliners, plasterers and supervisors
