

Jack – Apprentice Technical Coordinator

Vistry Group

Construction design and build technician (Level 4)

Why an apprenticeship?

I chose an apprenticeship as it allows me to work as well as study and earn a recognised qualification. An apprenticeship also offered me the chance to gain experience in the construction industry.

What were you doing before you started your apprenticeship at Vistry?

Before I started my apprenticeship at Vistry I completed my level 3 qualification at college. I then took a couple of jobs in retail during the pandemic before I found the apprenticeship that was the right one for me.

Tell us about your job role and what you love about it?

I am an apprentice working in the Technical team. I enjoy the fact that every day is different with new challenges to take on. The work is interesting and you are constantly learning something or developing new skills.

What advice would you give to someone looking to do an apprenticeship?

The advice I would give is pick something that you find interesting and want to learn about. There are so many different opportunities in the construction industry and within Vistry, it is hard work but it is great to earn and learn.

What would you like to do after your apprenticeship?

I would ideally like to progress with Vistry and there is the opportunity to do that. I want to keep gaining knowledge and experience to move forward through the company.

The apprenticeship gives you a Nationally recognised Industry qualification which provides lots of pathways to progress your career.
