

# Supporting safe working at height

## To ensure everyone that works at height comes down safely...

- Check working platforms are installed properly with no open voids.
- Check that fall protection equipment is inspected and checked prior to use.
- Ensure that ladders are inspected every seven days and checked prior to use.
- Do not alter any scaffold components unless you are authorised to do so.

## The statistics

In 2023-24...

**50** people lost  
their lives

**37,000** people were  
injured

Over the last 10 years...

**369** people lost  
their lives

**418,000** people were  
injured

**NO FALLS  
WEEK** 12 - 16  
MAY 2025  
*Help us save lives by stopping falls*
