

Fallicheck - helping to reduce accidents, **saving you money**

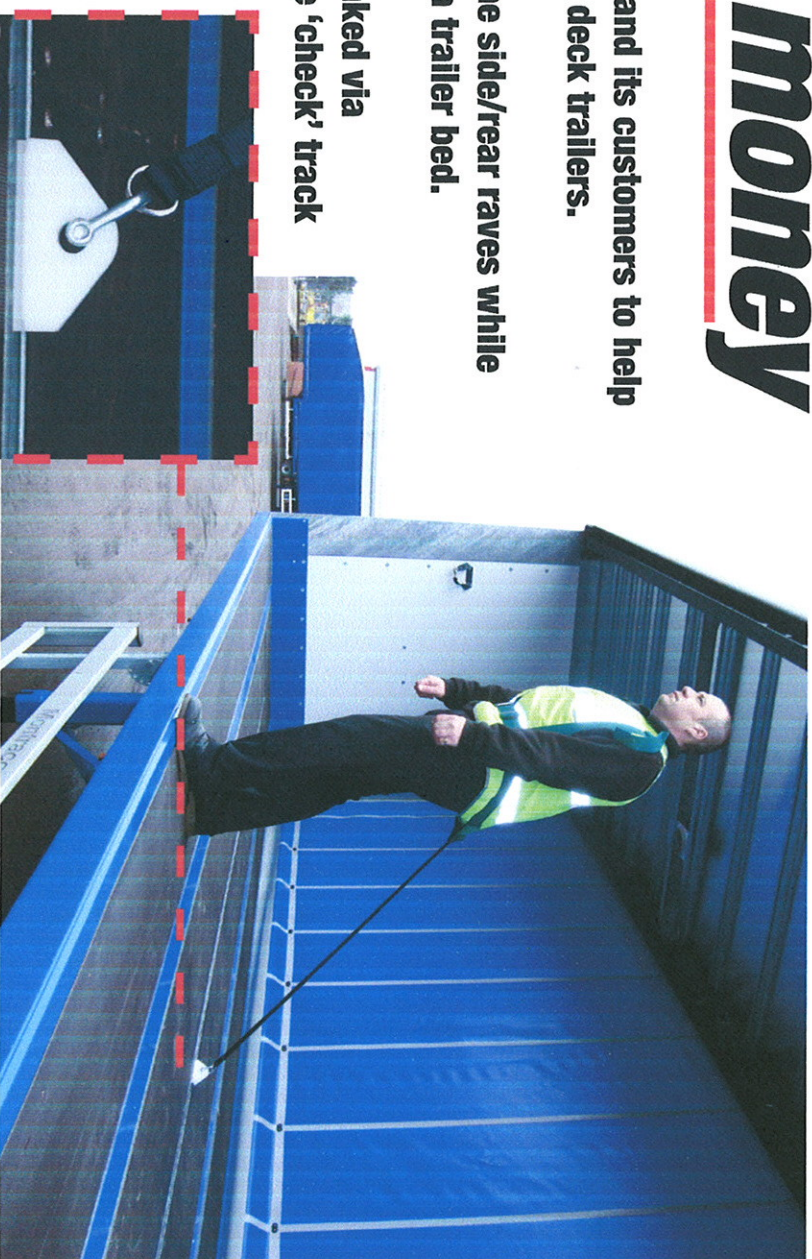

Fallicheck - developed jointly by Montracon and its customers to help stem the alarming number of falls from open deck trailers.

Fallicheck - checks operator movement at the side/rear raves while allowing freedom to move along and across a trailer bed.

Fallicheck - includes an operator harness linked via a clip on strap to a nylon slider set within the 'check' track that runs along the centre of the trailer.

Fallicheck - primarily for curtainsiders and flat platforms.

Fallicheck - available for retrofit in Montracon approved workshops.

▶ Nylon slider links operator to 'check' track

▶ Checks operator movement at the side/rear raves
