

New Housing Pipeline

Q2 2013 report

Published Sept 2013

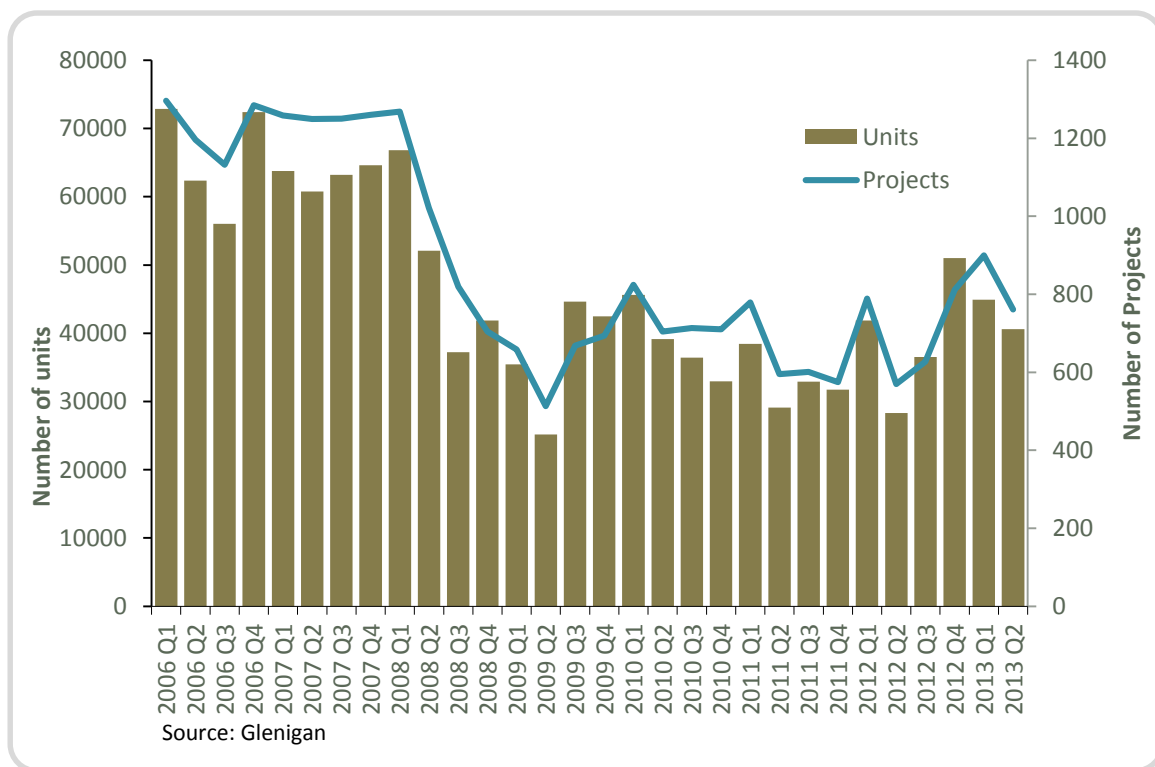

Analysis of market conditions and prospects
prepared by Glenigan.

New Housing Pipeline

The flow of residential planning approvals eased further during the second quarter of 2013. Nevertheless the number of residential units granted planning approval during the first half was still 22% up on a year ago. Social housing approvals remained positive; although down on the first three months of 2013, applications was 44% up on a year ago. Similarly the number of private sector projects securing approval slipped back against the preceding three months but was 30% up on a year ago.

Overall Glenigan recorded the approval of around 40,600 residential units during the second quarter of this year; a 43% increase against the same period of 2012, although 10% fewer units than during the three months to March 2013.

Chart 1: Residential planning approvals (Great Britain)

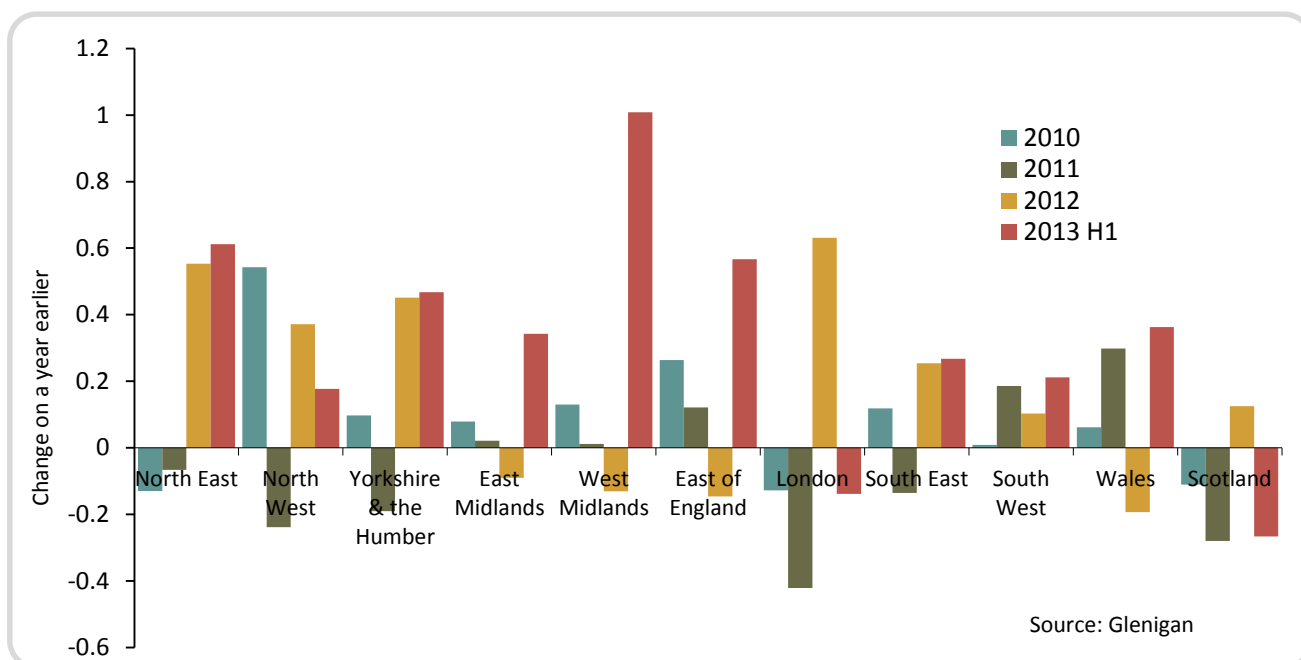

The number of private sector projects securing approval during the second quarter was 12% down on the preceding quarter. The number of units granted planning permission on private sector projects similarly declined, being 10% down on the first three months of 2013.

Nevertheless the number of approvals during the quarter was 30% up on the second quarter of 2012, while the number of units approved was 37% higher against the same period.

The second half of last year saw a strengthening in approvals in the smaller social housing sector. This positive trend has continued into 2013 and, while the number of project

approvals during the second quarter was 29% down on the first three months of the year, they were still 44% up on a year ago.

Chart 2: Residential planning approvals by region (No. of units)

Regionally, the North of England and the Midlands recorded a marked strengthening in unit approvals during the first half of 2013. Whilst the rise in the North of England is a continuation of last year’s positive trend, the increase in the Midlands reversed the drop in planning approvals seen during 2012. Similarly, following last year’s poor performance, Welsh approvals in the first half were up by over a third. The more modest rise in approvals in southern England was prompted by a drop in the number of units approved in London.

Table 1: Number of residential units approved

N.B. Projects involving 10 or more residential units.

Notes:

This report is based upon an analysis of housing projects being tracked by Glenigan and held on its database of construction projects. The following restrictions and filters apply to the analysis:

1. Projects included are for 10 or more units
2. Housing schemes are included where the development is primarily identified as being: Apartments/ flats, Bungalows, Houses/ Luxury Housing or Sheltered Housing. Key Worker Accommodation or Sheltered Housing.
3. In addition mixed used developments involving 10 or more residential units are also included in the analysis.
4. Elderly people's homes, Hostels and student accommodation have been excluded from the analysis.
5. Approvals are recorded at the detailed planning stage. Where a project has secured outline planning approval and the detailed consent is being resolved through the approval of reserve matters the date of 'detailed consent' is deemed to be that of the approval of reserve matters. In the case of some projects, the reserve matters are approved piecemeal; in these circumstances the earliest approval date has been used in order to avoid double counting.

Housing Approvals

The tables provide a regional breakdown of new building planning approvals since 2007

About Glenigan

Glenigan provide the most up-to-date and detailed UK construction contract sales leads and analysis to help companies win more contracts.

Do you spend hours looking for new business?

Glenigan provides you with a constant supply of leads so you can quickly find the right projects to target.

Do you struggle to find the right contacts?

Glenigan provides you with the names, email addresses and phone numbers of decision makers.

Do you need to track the construction market?

Glenigan has comprehensive construction market data, analysis, forecasts and league tables. Use our custom research and analysis services to evaluate specific market opportunities and inform your strategic decisions.
