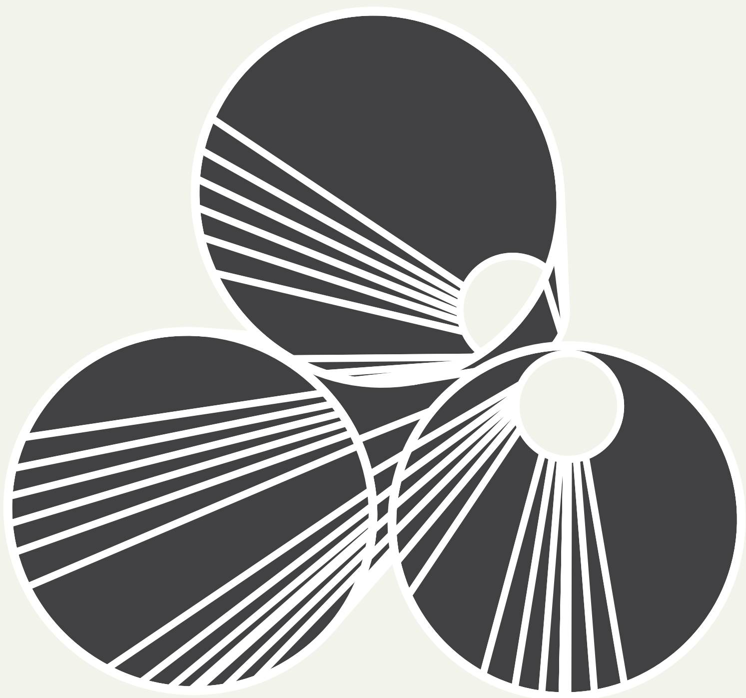
NEW

HOUSING PIPELINE



Q3 2016 REPORT

Published Dec 2016

Analysis of market conditions and prospects prepared by Glenigan.

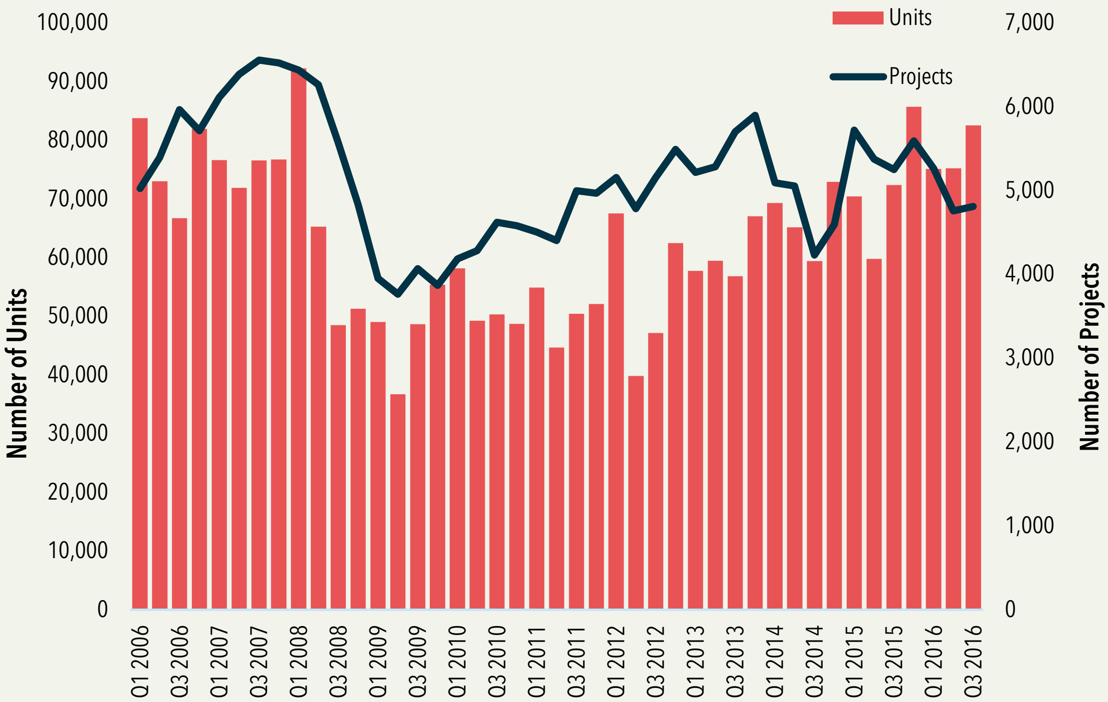
HOME BUILDERS FEDERATION

NEW HOUSING PIPELINE

Residential planning approvals remained firm during the third quarter of 2016. The number of units approved during the quarter was 10% up on the second quarter 2016 and 14% higher than during the same period last year. The year on year rise was driven by 22% increase in the number of private housing units approved. In contrast 27% fewer social housing units were approved.

Overall Glenigan recorded the approval of around 82,600 residential units[1] during the third quarter of 2016. Housing schemes of ten or more units accounted for 69,900 or 85% of approved units; the remainder being on smaller new build projects including self-build schemes, homes being included within non-residential projects and the conversion of non-residential properties.

Chart 1: Residential planning approvals (Great Britain)



N.B. Includes residential projects of all sizes, residential units on non-residential schemes and conversions. Source: Glenigan

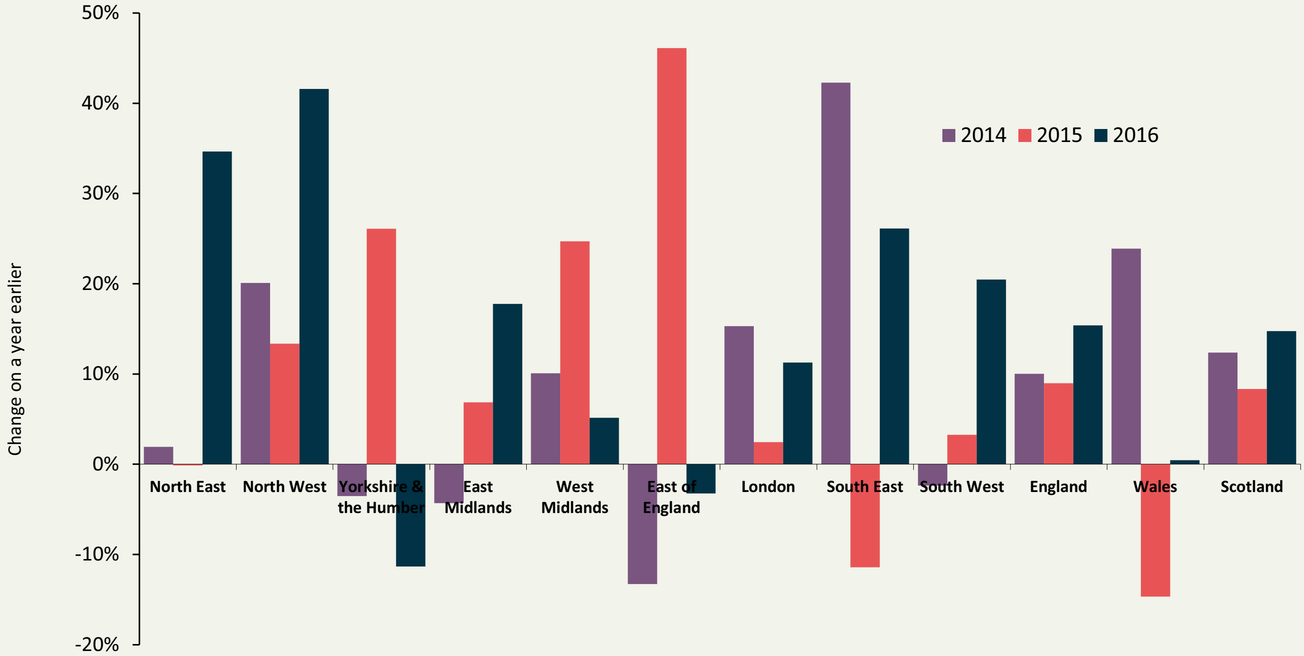
At 2,888, the number of private sector housing projects (schemes of 3 or more units) securing approval during the second quarter was 10% down on the April to June 2016 and 10% higher than during corresponding period a year ago.

The number of units granted planning permission on private sector projects has grown more rapidly against a year ago. Over 69,200 private units were granted permission during the third quarter, a 4% rise on the preceding quarter and 22% higher than a year ago.

Whilst the number of social housing projects (of three or more units) improved during the third quarter, being 9% up on the preceding three months, the number of projects remained 21% lower than a year ago. The number of social housing units approved also improved from the low level seen during the previous three months. At 9,300, the number of social housing units during 2015 Q3 was almost double the level seen

1 The range of projects covered by this report has been extended and now includes new build housing projects of all sizes, including schemes of less than 10 units, the conversion of non-residential buildings and residential units on mixed use developments.

Chart 2: Residential planning approvals by region (No. of units)



N.B. Includes residential projects of all sizes, residential units on non-residential schemes and conversions. Source: Glenigan

in the previous quarter. However, despite this rise, unit approvals were 27% lower than a year earlier.

Most parts of the country have seen a firm rise in units approved compared to the third quarter of 2015. London, the South East, Wales and the North West recorded the sharpest rises, being 38% 36%,32% and 36% up on a year ago respectively . In contrast unit approvals were lower in the North East, Scotland, West Midlands and the East of England.

Table 1: Number of residential units approved

	North of England	Midlands	Southern England	England - All	Wales	Scotland	Great Britain

N.B. Residential projects of all sizes and residential units on non-residential projects and conversions.

Overall unit approvals in Great Britain during the first nine of 2016 were 15% up on a year earlier, with the North of England witnessing the sharpest growth. Wales remains a weak spot; despite the improvement in the third quarter approvals for the first nine months were unchanged on a year ago.

NOTES

This report is based upon an analysis of housing projects being tracked by Glenigan and held on its database of construction projects. We have now extended the range of projects covered by this report to in order to provide a more complete assessment of the residential development pipeline.

The following restrictions and filters apply to the analysis:

1. New build projects of all sizes are covered by the report (Coverage was previously restricted to approvals for 10 or more units.)
2. Housing schemes are included where the development is primarily identified as being: Apartments/ flats, Bungalows, Houses/ Luxury Housing or Sheltered Housing, Key Worker Accommodation or Sheltered Housing.
3. Conversions of non-residential properties for housing are included.
4. Private and social housing data includes schemes of 3 or more units.
5. Total residential approvals include 1 & 2 unit schemes together with residential units on mixed used developments
6. Elderly people's homes, Hostels and student accommodation have been excluded from the analysis.
7. Approvals are recorded at the detailed planning stage. Where a project has secured outline planning approval and the detailed consent is being resolved through the approval of reserve matters the date of 'detailed consent' is deemed to be that of the approval of reserve matters. In the case of some projects, the reserve matters are approved piecemeal; in these circumstances the earliest approval date has been used in order to avoid double counting.

HOUSING APPROVALS

The tables provide a regional breakdown of new building planning approvals since 2009

ABOUT GLENIGAN

Glenigan is the trusted provider of project information, analysis and sales leads for the construction industry. Its comprehensive company intelligence has been helping contractors, sub-contractors and suppliers build new working relationships for more than 40 years.

With exclusive content from leading industry bodies including The Builders' Conference, Glenigan offers the widest coverage of UK tenders and construction contracts. These construction project leads are unique to Glenigan and unavailable anywhere else.

The housing approvals data analysed in this report is drawn from Glenigan's extensive database of current and planned construction projects. Glenigan's detailed coverage of planned housing projects across the UK offers valuable strategic and tactical insights into developers' active sights and pipeline, with sites tracked through to completion.
