

NEW
HOUSING PIPELINE

Q3 2017 REPORT

Published January 2018

NEW HOUSING PIPELINE

The residential development pipeline remains strong. The third quarter saw renewed strengthening in approvals after the slight cooling during the previous three months. The number of units approved during the quarter was 6% up on the second quarter of 2017 and 9% higher than during the same period last year. The year-on-year rise was driven by a 17% increase in the number of private housing units approved which more than offset a 36% drop in social housing units approved. Overall the number of residential units approved during the first nine months was 18% higher than during the same period of 2016.

Glenigan recorded the approval of around 90,400 residential units¹ during the third quarter of 2017; at 78,600 units, housing schemes of ten or more units accounted for 87% of approved units; the remainder being on smaller new build projects including self-build schemes, homes included within non-residential projects, and the conversion of non-residential properties.

At 2,941, the number of private sector housing projects (schemes of 3 or more units) securing approval during the third

Chart 1: Residential planning approvals (Great Britain)

N.B. Includes residential projects of all sizes, residential units on non-residential schemes and conversions. Source: Glenigan

quarter was 5% up on April to June 2017 and 2% higher than during the corresponding period a year ago.

The growth in the number of units granted planning permission on private sector projects has been more marked. Over 81,200 private units were granted permission during the third quarter, an 8% rise on the preceding quarter and 17% ahead of a year ago.

At 154, the number of social housing projects (of three or more units) increased after the sharp decline seen during the second quarter. The number of project approvals was 16% up on the preceding three months and 1% ahead of the third quarter of 2016. However, the average scheme size has declined, prompting a fall in the number of social housing units approved, which at 5,936 was 13% down on the second quarter and 36% lower than a year ago.

Most parts of the country saw a rise in units approved during the third quarter compared to the same quarter of 2016. Unit approvals in Yorkshire and the Humber and in London were down 15% and 25% respectively against strong approvals

1. The range of projects covered by this report has been extended and now includes new build housing projects of all sizes, including schemes of less than 10 units, the conversion of non-residential buildings and residential units on mixed use developments.

Chart 2: Residential planning approvals by region (No. of units)

levels a year ago. Approvals in the South West were 4% down. The number of units approved in all other parts of the country were ahead of a year ago. The strongest growth was in the East Midlands, South East, North East, and East of England where approvals were respectively 40%, 31%, 73% and 32% up on the third quarter of 2016.

N.B. Residential projects of all sizes and residential units on non-residential projects and conversions.

Overall unit approvals in Great Britain during the first nine months of 2017 were 18% up on a year earlier, with firm growth down the east coast of England, in the South East, the Midlands and in Scotland and Wales. The South West was the only part of the country to see a decline during the first nine months, with the number of units approved 7% down on a year earlier.

HOUSING APPROVALS

The tables provide a regional breakdown of new building planning approvals since 2009

NOTES

This report is based upon an analysis of housing projects being tracked by Glenigan and held on its database of construction projects. We have now extended the range of projects covered by this report to in order to provide a more complete assessment of the residential development pipeline.

The following restrictions and filters apply to the analysis:

1. New build projects of all sizes are covered by the report (Coverage was previously restricted to approvals for 10 or more units.)
2. Housing schemes are included where the development is primarily identified as being: Apartments/ flats, Bungalows, Houses/ Luxury Housing or Sheltered Housing, Key Worker Accommodation or Sheltered Housing.
3. Conversions of non-residential properties for housing are included.
4. Private and social housing data includes schemes of 3 or more units.
5. Total residential approvals include 1 & 2 unit schemes together with residential units on mixed used developments
6. Elderly people's homes, Hostels and student accommodation have been excluded from the analysis.
7. Approvals are recorded at the detailed planning stage. Where a project has secured outline planning approval and the detailed consent is being resolved through the approval of reserve matters the date of 'detailed consent' is deemed to be that of the approval of reserve matters. In the case of some projects, the reserve matters are approved piecemeal; in these circumstances the earliest approval date has been used in order to avoid double counting.

ABOUT HBF

The Home Builders Federation (HBF) is the representative body of the home building industry in England and Wales. HBF's members' accounts for 80% of all new homes built in England and Wales in any one year, and include companies of all sizes, ranging from multi-national, household names through regionally based businesses to small local companies.

ABOUT GLENIGAN

Glenigan is the trusted provider of project information, analysis and sales leads for the construction industry. Its comprehensive company intelligence has been helping contractors, sub-contractors and suppliers build new working relationships for more than 40 years.

With exclusive content from leading industry bodies including The Builders' Conference, Glenigan offers the widest coverage of UK tenders and construction contracts. These construction project leads are unique to Glenigan and unavailable anywhere else.

The housing approvals data analysed in this report is drawn from Glenigan's extensive database of current and planned construction projects. Glenigan's detailed coverage of planned housing projects across the UK offers valuable strategic and tactical insights into developers' active sights and pipeline, with sites tracked through to completion.
